Dear Bill,

I learned today from Gianfranco over at OSP that Dr Singha has approved a reduced overhead for our construction MOU with Jlab. The reduced rate is 30.5%, justified by the fact that the work is shared between on-site and off-site, and that a piece of equipment is being delivered at the end to an off-site facility. This is good news for us. Thank you for your advice and support in this matter.

-Richard J.
